DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 24-33 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 24-33 are rejected under 35 U.S.C. 102(e) as being anticipated by U.

S. Patent No. 6,503,203 to Rafter et al.

Regarding Claims 24-33 Rafter teaches a system for setting a parameter for contrast agent imaging comprising: a user input control; a memory operable to store a table of a plurality of transmit sequences and plurality of transmit levels (Fig. 2 and Claim 27); a processor operable to select different transmit sequence and levels. (Abstract; and Fig.2 and Claim 27)

Regarding Claims 25, Rafter teaches the use of a button as an input control. (Col. 7 lines 40-45)

Claims 24-33 are rejected under 35 U.S.C. 102(e) as being anticipated by U. S. Patent No. 6,503,203 to Rafter et al. in view of *In re Casey*, 370 F.2d 576,152 USPQ 235 (CCPA 1967)

Regarding Claims 24, 26, 28, 31, 32, and 33 the body of the claim uses the word "operable" which, the examiner views the term "operable" as functional language. Wherein, a processor, operable for performing a task, merely defines the claim as a "processor capable of performing the task" which could very well be any computer processor. Examiner would like to suggest the term "programmed to" to replace the term "operable" to over come this rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
